

CABLE & EQUIPMENT MANAGEMENT RANGE

APPLICATION: Our range of internal wall and base mounted cable & equipment management and handling accessories has been designed to cater for a wide range of cable types & sizes along with various types of fibre optic splice enclosures. When installed they either provide an anchor point for pulling cable, manage the maintenance loop of the cable, provide something to strap a passing cable to the side wall to prevent damage to it or hold a joint enclosure up off the chamber floor.

STEEL BEARER BRACKETS

These units are used most commonly by British Telecom and consist of a wall mounted channel (WT) and adjustable arm (BR) held to the correct height by a locking pin (LP).

Slot in the arm allow cable or enclosures to be securely strapped to it.

All parts are produced from hot dip galvanised steel.

It is possible for us to supply wall brackets up to 1880mm in length and bearer arms up to 365mm long, please enquire separately for these items as they carry a longer lead-time.

TYPE	LENGTH	CODE
WT	279mm	A750
	508mm	A751
BR	136mm	A752
	187mm	A753
	263mm	A754
LP	N/A	A755

PLASTIC CABLE LOOP HOOKS

These Polypropylene fittings consist of a wall mounted plaque and separate hook which slots on to the plaque.

When mounted cable can easily be dressed into the hooks. To work on the cable or enclosure that it feeds; the hooks detach from their plaques and remain in place around the cable loop as it is raised from the chamber. Cable can then be un-coiled a layer at a time (as required). The whole process is simply reversed to re mount the loop.

The internal space of the hook in which cable can fit is 65mm x 140mm this will accommodate at least 50 metres of a 244 fibre cable.

Product CODE: A774

STEEL CABLE SUPPORT BRACKETS – “SUPPORT DE CABLES”

These units are from an approved France Telecom source and are fitted horizontally to the top section of our France Telecom approved ‘L’ and ‘K’ ULTIMA series STAKKAboxes™. All parts are produced from hot dip galvanised steel.

TYPE	LENGTH	CODE
L1	430mm	A756
L2	1060mm	A757
L3	1200mm	A758
½ L4	585mm	A771
K1	585mm	A759
K2	1285mm	A760

In addition to the above items, this bracket fits vertically to the sidewall of the L5 France Telecom STAKKAbox™. Product CODE: A761

CABLE PULLING ANCHORS

Wall Mounted

This version is from an approved France Telecom source and is specially designed to meet their pull out test loads when fitted to the end wall of our France Telecom approved L5 & K2 ULTIMA STAKKAbox™. In addition it would work equally as well on any of our ULTIMA chambers. Product CODE: A762

Base Mounted

This version is designed to meet the British Telecom test pull load of 2.5 tonnes. They are pre-fitted under the base section of our STAKKAboxes™. This table shows the standard sizes available – other sizes can be made; please enquire separately for these items as they carry a longer lead-time.

CHAMBER SIZE	CODE
915mm x 445mm JB4	A763
1310mm x 610mm JB6	A764

ACCESSORY MOUNTING BOLTS

These Zinc coated self tapping coach screws are ideal for mounting any kind of wall furniture detailed above. Simply drill a pilot hole where required and tighten the screw into place. For Steel wall brackets use Product CODE and for Cable Loop Plaques use Product CODE

FACTORY KIT OUT SERVICES

FACTORY PRE-FITTED ACCESSORIES

We can also pre-fit any of the cable and equipment accessories outlined above. The position, size and detail of these should be shown on one of our Product Request Forms – available from sales.
