

CHAMBER ACCESS

APPLICATION: These products enable a person to access deeper chambers.

STEPS

Produced from hot dip galvanised steel the steps are simply mounted to the chamber wall.

Due to the twin wall nature of the STAKKAbOX™ it provides a very secure step when installed.

Product CODE A765

STEP & HAND RAIL

Produced from hot dip galvanised steel this item is attached directly to the chamber wall.

Made by an approved France Telecom source it is specially designed to meet their pull out test loads when fitted to the wall of our France Telecom approved L5 ULTIMA STAKKAbOX™. In addition it would work equally as well on any of our ULTIMA chambers including the SNCF S3 unit.

As with the Steps above - due to the twin wall nature of the STAKKAbOX™ it provides a very secure step when installed.

Product CODE A770

ACCESSORY MOUNTING BOLTS

These Zinc coated self-tapping coach screws are ideal for mounting the above steps and even allow them to be retro fitted once the chamber has been constructed.

Simply drill a pilot hole where required and tighten the screw into place.

Product CODE A861

FACTORY PRE-FITTED ACCESSORIES

We can also pre-fit steps at the factory, the position of these should be shown on one of our Product Request Forms – available from sales.
